CAREER OBJECTIVE

Driven B.Tech (AI & ML) undergraduate with hands-on experience building and evaluating machine learning and computer vision models in Python. Quick to learn new tools and eager to apply strong analytical and problem-solving skills as an AI/ML Engineer.

QUALIFICATION

Bachelor of Technology in Artificial Intelligence and Machine Learning (2023 - 2027)

Dhanalakshmi Srinivasan University | CGPA: 8.23

Intermediate (2021 - 2023)

Sri Gayathri Junior College, Anantapur District | Percentage: 85%

SSC (2020 - 2021)

ZPH High School, Siddarampuram, Anantapur District | Percentage: 93%

SKILLS

- **Machine Learning:** Data preprocessing, model development, training and evaluation using scikit-learn.
- **Computer Vision:** Real-time feature extraction and activity classification with OpenCV.
- **Data Handling:** Python, Pandas, NumPy and Matplotlib for cleaning, analysis and visualization.
- **Programming Foundation:** Python, C++, OOP, Data Structures, Algorithms, Memory Management.
- **Collaboration:** Worked with mentors and peers across two internships under deadlines.

INTERNSHIPS

AI/ML Intern | Averixis Solutions Pvt. Ltd. (Apr 1 - May 31, 2026)

- Built and evaluated ML models end to end: data preprocessing, model development and testing using Python.
- Collaborated on model development using Pandas, NumPy and scikit-learn.

C++ Programming Intern | CodeAlpha (Jul 1 - Jul 31, 2026)

- Implemented programs applying data structures, control flow and modular coding practices.
- Practiced memory management and pointers to build efficient, testable C++ solutions.

PROJECTS

Activity Performance Monitor | Python, OpenCV, Pandas, NumPy, Matplotlib

- Designed and coded a real-time computer vision pipeline for feature extraction and activity classification.
- Structured and tested data-processing logic using OOP-style modular code for maintainability.

Customer Churn Prediction | Python, scikit-learn, Pandas

- Cleaned and encoded a public telecom dataset and trained Logistic Regression and Random Forest models.
- Compared models using accuracy, precision and recall to select the best performer.

Sentiment Analysis of Product Reviews | Python, scikit-learn, NLTK

- Built a TF-IDF and Logistic Regression classifier to label product reviews as positive or negative.
- Evaluated the model on a held-out test set using accuracy and a confusion matrix.

CERTIFICATIONS

- Python Programming — Internshala (March 2025)
- Basics of Data Science — uniAthena (April 2025)
