CAREER OBJECTIVE

Motivated B.Tech (AI & ML) undergraduate with a strong foundation in C++, Python, data structures, algorithms and object-oriented programming. Seeking a Software Developer role to write clean, maintainable code and keep learning on real projects.

QUALIFICATION

Bachelor of Technology in Artificial Intelligence and Machine Learning (2023 - 2027)

Dhanalakshmi Srinivasan University | CGPA: 8.23

Intermediate (2021 - 2023)

Sri Gayathri Junior College, Anantapur District | Percentage: 85%

SSC (2020 - 2021)

ZPH High School, Siddarampuram, Anantapur District | Percentage: 93%

SKILLS

- **Programming Languages:** C++, Python, JavaScript, HTML, CSS.
- **Data Structures and Algorithms:** Arrays, Linked Lists, Stacks, Queues, Sorting, Searching, Recursion.
- **Software Fundamentals:** Object-oriented programming, memory management and pointers, modular and testable code.
- **Web Development:** Responsive front-end design with HTML, CSS and JavaScript.
- **Collaboration:** Delivered results with mentors and peers across two internships under deadlines.
- **Tools:** GitHub for version control and sharing project work.

INTERNSHIPS

C++ Programming Intern | CodeAlpha (Jul 1 - Jul 31, 2026)

- Completed a virtual internship focused on core C++ programming, OOP and software development fundamentals.
- Implemented programs applying data structures, control flow and modular, maintainable coding practices.
- Practiced memory management and pointers to build efficient, testable C++ solutions.

AI/ML Intern | Averixis Solutions Pvt. Ltd. (Apr 1 - May 31, 2026)

- Wrote Python code for data preprocessing, model development and testing.
- Collaborated with a team using Pandas, NumPy and scikit-learn.
- Tested code on sample data and fixed issues to keep results reliable.

PROJECTS

Library Management System | C++, OOP, File Handling

- Built a console application with classes for books, members and loans, supporting add, search, issue and return.
- Stored records in files so data persists between runs and tested edge cases such as duplicate and missing entries.
- Applied OOP principles such as encapsulation and modular class design for easy maintenance.

Expense Tracker Web App | HTML, CSS, JavaScript

- Built a responsive app to add, filter and total expenses by category.
- Designed a clean interface that works on both desktop and mobile.
- Used JavaScript to update totals instantly as entries are added or removed.

Personal Portfolio Website | HTML, CSS, JavaScript

- Designed and developed a fully responsive website with a clean, user-centric UI/UX to present technical work.
- Structured the site with semantic HTML and CSS for a clean layout across screen sizes.
- Structured the site so visitors can find my work and contact details quickly.

Activity Performance Monitor | Python, OpenCV

- Designed a real-time pipeline using OOP-style modular code, structured and tested for maintainability.
- Used Python, OpenCV, Pandas and NumPy to extract and process features from video frames.

Sorting Algorithm Visualizer | HTML, CSS, JavaScript

- Built an interactive page that animates bubble, selection and insertion sort step by step.
- Reinforced understanding of algorithm behaviour and time complexity.

COURSEWORK

Data Structures and Algorithms, Object-Oriented Programming, Database Fundamentals, Operating Systems Basics, Web Development, Python Programming

CERTIFICATIONS

- Python Programming — Internshala (March 2025)
- Basics of Data Science — uniAthena (April 2025)
